The EspaceProprio app has a new feature you can use to estimate the market value of your home using well-defined criteria. It's called Market Value Estimation (MVE) tool.

It can help you make informed decisions about selling, buying, renovating and maintaining your property.

1. If you haven't yet, download the EspaceProprio app on the [App Store](#) or [Google Play](#). If you already have it, be sure to update it.
2. Then enter the details of your property in the app so it can estimate its market value.
3. We want to know how satisfied you are with your estimate.
4. Go to the **More** menu to share your opinion and help our teams improve this new feature!

MVE helps users understand how various factors and market trends influence their property's value, which helps them make more informed* decisions about buying, selling, maintaining or renovating their property.

** MVE provides results for information only. It should never be a substitute for the advice of a real estate professional. The value suggested by MVE is not an appraisal, an actual cash value, or a guaranteed selling price. It is also not a replacement for the opinion of a real estate broker on the price to set for the target property, nor for that of a chartered appraiser who would provide their appraisal in an official report submitted as part of a mortgage granting process.*
